## Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:
Listing of Claims:

- 1. (Currently Amended) A sustained release composite comprising a three-dimensional piece of calcium silicate having a \*\*antolite-\*\*xonotlite\*\* structure and which includes fibers of textile glass and borosilicate glass, and a fire starting agent.
- 2. (Currently Amended) The composite according to claim 1 wherein the calcium silicate in addition to the fire starting agent, contains about 0.5% wood pulp fibers, from about 0.5% to about 1% textile grade glass fibers, and about 1% bentonite clay.

## Claim 3. (Cancelled)

4. (Currently Amended) The composite according to claim 3 wherein the fire starting agent is selected from the group consisting of candle wax, mineral spirits, propyleneglycol and mixtures thereof.

Claims 5-7. (Cancelled)

Appln. No. 10/765,906 Amd. dated November 19 2007 Reply to Office Action of October 5, 2007

- 8. (Currently Amended) The composite according to claim 1 wherein the composite is packaged in a package made of a material that maintains the active—fire starting agent in the composite until the package is opened.
- 9. (Currently Amended) The composite according to claim \$-13 wherein the cylindrical container has a snap on top.
- 10. (Currently Amended) The composite according to claim  $9-\underline{13}$  wherein the cylindrical container has a snap on top.
- 11. (Currently Amended) A method for forming a fire starter comprising impregnating a block comprising a three-dimensional piece of calcium silicate having a xontolite xonotlite structure and in which are fibers of textile glass and borosilicate glass with a fire starting material.
- 12. (Currently Amended) The method according to claim 11 wherein the calcium silicate, in addition to the fire starting agent, contains about 0.5% wood pulp fiber, from about 0.5% to about 1% textile grade glass fibers and about 1% bentonite clay.
- 13. (New) The composite according to claim 8 wherein the package is a cylindrical container.
